LOUISVILLE THEATER.-The Theater closed rather suddenly on Tuesday evening last—the Keller Troupe refusing, we are told, to play any longer to houses that would not pay expenses. To give a reason why this troupe did not draw good houses during the engagement at the Theater, nor when they were at Mozart Hall last winter, would be impossible. It may be that the people have become tired of public amusements, and choose to spend their evenings in the social circle, or the coffee-house; we can imagine

no other reason.
When the Theater will open again is not known-possibly not till Mr. Baker takes charge in the fall. It was said that the Marsh troupe were to play an engagement; but that arrange ment may have been set aside, in consequence of a law process in which some of the members are involved. It will make but little difference, however; the people will rest awhile from dramatic entertainments.

TIROLI (GERMAN) THEATER.-We attended mooth as velvet. To be had of all Druggists, Permers, and Fancy Goods Dealers throughout the fifteen cents to the door keeper, you enter an inclosure, and are in the Theater; quite an airy summer place it is. SATURDAY JUNE 13, 1957.

The Kuow-Nothings have issued a circ lar containing extracts from the Courier preferring a man from the city for the office of Judge of the Court of Appeals, to one from the country. "Will the country see this attack made upon them and not resist it," says the eircular. It speaks of a crusade of the city against the country, and appeals to Green river in behalf of Judge Wheat, on account of his locality. The brethren must be losing faith in Louisville, when they scribble about her engaging in a crusade against a Know-Nothing candidate for Judge. Considering the political character of this city, it would be idle to sup pose that any arguments will likely induce the faithful to abandon the dark-lantern caudidate. Instead of saying the Louisville Courier has pubtished such articles, the circular says one of the Louisville democratie organs has published them. They know precisely what paper these articles appeared in, but such is the secrecy of the brethren that they couldn't afford to sav what paper by name. We want it distinctly understood tha we make no claims for our candidate on account of his locality. We don't believe Louisville entitled to such consideration. We support Mr. Bullitt because, in the first place, we con sider him better qualified than his competitor. of judging, is uniform as to his excellent qualiclasses of the citizens of Kentucky in politics. not believe many voters will prefer any man on account of his locality. There is no such feel ing in this city among Democrats. If the Know Nothings vote for Mr. Bullitt because he lives in this vicinity-for he lives in Jefferson county -we shall have no objection to their vote on that account, although we shall not indorse their reasons for it. At the same time, we think the reason about as good as anything they usually right, even if their reasons are indifferent.

up poetry from the Devil is a fair indication as to whither the whole thing is tending. It is therefore time for any sensible Know Nothing neeted with the temperance cause invited John to onit its company.

Besides, the Know-Nothings undertook, with turer, to deliver a farewell address in New their dark lantern associations, to make a nom ination, and the committee located in this city 18th of July. The invitation was accepted, and had the management of the returns. There the address was delivered on Thursday, the 11th were several aspirants, and which got a major ity of the vote? Can any Know-Nothing in Louisville assure us that Judge Wheat got the editor has purchased a country seat at Fort nomination fairly? Did not the Louisville Committee fix up the nomination to suit themselves, and pass off the nominee as the one selected by the party? While they are striving to get up a prejudice in the country against Louisville, is it not the fact that the Louisville K. N. Committee made a candidate for the whole

IT On Monday next the election for Judge of this Appellate District takes place. We have a candidate every way worthy of our support Let every Democrat in this city be sure to vote Mr. Bullitt is well-known to our citizens, and hi qualifications for the office are unquestioned and unquestionable. The Kuow-Nothings have : regular nominee, and will resort to all expedients to elect him. They show, by the circular we publish in another column, what sort of means they will employ. We certainly don't want a judge elected by demagoguery of this kind. Judicial elections ought certainly to be free from low tricks of this sort. We don't want a Judge of the Court of Appeals who is elected to that position by appeals to the prejudiees of the country against Louisville. Mr. Bullitt has no hostility against the country; he lives in it. Eleet him, and he will do equal and exact justice to both city and country, according to law. He has the talent and the will. We have made no attacks upon Judge Wheat, except as to his public position. He is like all the Know-Nothing eandidates, an astonishingly great man in the estimation of the organs. The

There is another reason why Judge Wheat Harvesting Implements, to take place at Syrashould not be supported; not on his own account, but on account of the action of his party in this case. Their dissimulation, from first to late efficient Actuary of the Mechanic's Instilast, is disgraceful. When they were preparing to make a party nomination, taking the vote of Messrs. Thos. Williams & Co.'s, may be found the lodges, &c., they were railing at a party hereafter at the popular hat establishment of race for the judiciary. Openly denouncing what Messrs. 13 We publish to-day, to the exclusion of ther matter, the general arrangements, premium lists, &c., for the Fifth Annual Exhibition of the United States Agricultural Society to be held at Louisville on the 1st, 2d, 3d, 4th, and 5th of September next. It embraces the full list of premiums offered, and should be carefully read by every citizen of Louisville and of Kentucky. As it will be impossible to send pumphlet copies of premiums and regulations to all parties interested, we would enforce upon the mind of every reader the importance of carefully preserving the current number of our paper containing this very valuable informa-

DProf. Holyoke, of the Louisville Female High School, does not fully approve the system of granting premiums to young ladies for proficiency in their studies. The course is discouraging in some instances to excellent and ambitious young minds. Indeed, young ladies who are well advanced should, and do, pursue their studies for the intellectual reward which proficiency invariably brings, and they rarely need an extraneous incentive. We admire his idea, however, of encouraging and rewarding neatness among his pupils. He has offered a premium of a beautiful golden thimble to the young lady who exhibits the neatest, cleanest, and best-preserved set of school-books. The books were submitted to the inspection of a mmittee of ladies of taste yesterday, and Prof. Holyoke will announce their decision on Monday. No teacher can boast of neater or more charming little creatures than the Profes sor numbers in his classes, and when the am ouncement is made, we will print the name of the young miss who is characterized as the neatest of all the neat little beings of the Female High School.

GRAND CONCERT AND STRAWBERRY FESTIVAL To-night the treble attraction of concert, fruit. and flowers is offered by the ladies at Mozart Hall, and we feel assured that with all this grand display and entertainment the hall will be by some of our best amateur singers, who volinteer to sing some of their finest pieces. The admittance will be the same as on former even ings. The Hall will be opened all day to vis itors; and the ladies will be in attendance to dispense the refreshments of the season.

ITWe have been shown a beautiful and skilfully wrought present, designed by the Hope Fire Company for Arthur J. Harrington, Esq., an honorary member and trustee of the company. The present is in the form of a breastpin, and is made of pure gold. The main pits forms a large anchor, an emblem of the com pany, which is attached by a golden drag-rope o a trumpet. Messrs. Vogt & Klink were the manufacturers, and the present is worthily be stowed upon a clever gentleman and one of the most active of our firemen.

We received a circular from Washington City yesterday, containing the intelligence that the office of the "American Organ" would be sold at an absolute and unconditional auction on Saturday, the 20th of June. The faction in the North seems to be selling out "unconditionally" to the Black Republicans, and we suggest the brethren of the South follow suit and lispose of themselves at some price. If they cannot find a purchaser, it would perhaps be advisable for them to give themselves away to some kind-hearted master.

CLASS XI. - IMPLEMENTS AND MA-

CHINERY.

In presenting the following list of premiums for the Implements and Machines of Agriculture, the Society desire to state to the public that they are well convinced that for the awards upon the comparative excellence of competing machines to be of real practical benefit to manufacturers, and more especially to tarniers themselves, they should be made ouly upon the results obtained by therough working trial of the same; and with this fact in view, it will, at its exhibitions of the present year, cause all articles embraced in the class of Agricultural implements and Machinery to be submitted to a thorough and impartial examination before a competent board of judges.

The wast increase of the area under cultivation, and the diminishing proportional number of laborers, render it a matter of first consequence to procure the great est possible variety of labor-saving machines; and, inamuch as their purchase is necessarily attended by a large outlay of capital, it is equally important that the public should be advised of the comparative merits of the various claimants to their patrowage. The awards, then, of an Agricultural Society, are important in proportion to the position of that Society before the public, and as these awards are beneficial when given to worthy educate, they are on the other hand productive of great

To meet the obligations which it necessarily assumes toward the nation, the United States Agricutural Society is this year about to institute its first Great National Field Trial of Agricultural Implements, and asks of manufacturers in every section of the country to lend their assistance in rendering it one of the most complete and important occasions of the kind which has ever been witnessed in one country or in Europe.

That the successful competitors may possess some token of their pre-eminence at its trials, the Society will cause to be made a magnificent medal in goll, silver, and bronze, to be awarded to articles of various classes and different degrees of merit.

Three Grann Golm Merals of Honor have been appropriated for the following objects:

First—For that machine which shall accomplish the most thorough disintegration of the soil with greatest economy of labor, time, and money. Under this head are included all steam plows and digging machines which propose to supersede the plow.

Second—For the best motive power for general farm use—either by wind, steam, or horse—to be adapted to all kinds of work. The Judges to decide which will accomplish the Intended purpose with least expenditure of power, time, and money.

Third—For the most important invention relating to Agriculture, which has been patented within the last three years, and which may be on exhibition; provided however, that the sume be thought worthy of such honor.

The award of a Grand Medal of Honor will depend however, that the same be thought worthy of such honor.

The award of a Grand Medal of Honor will depend npon a Council of all the Judges of Inaplements and machinery who may be appointed, and be decided by a majority of votes.

For machines and implements of the various classes, which may not be enumerated in the following schedule, special Certificates of Commendation, Diplomas and Discretionary medials will be provided and be placed at the disposal of the juries of awards.

In no case will a premium be granted to an implement on exhibition if it be not worthy of such distinction, although it may not have competitors, and in all cases the preference shall be given to those which perform their proposed labor with the greatest reference to economy.

economy.

The object of these trials being to show the working qualities and not the ornamental appearance of unchines, it is desirable and expected that the competing article shall not be of better quality than the average stock on sale at the warehouse, and if unanfacturers desire to exhibit great excellence of workmanship and adornment in their implements, they are requested likewise to enter one of average excellence, with the price of the same attached.

Each exhibitor should prepare, in writing or print, a condensed and lucid txtaement of the superiority claimed by him for his implement over others of a similar nature, which should be given to the chairman of the jury of awards in his Class, and he should be prepared to exhibit and explain the several points if so requested. By so doing the labor of the jury will be much lightened and the inventor or manufacturer be enabled to excure a complete attention to the important features of his machine or implement.

Notice of Intention to exhibit machines may be given to the Assistant Secretary, L. A. Whiteley, Louisville, Ky., or to the Secretary of the Committee on Implements, H. S. Olcott, Westchester Farm School, Mount Vernou, X. Y., or to the Seprelutendent, Joseph E. Holmes, Newark, Ohlo, until August 15th, all communications after that date must be addressed to the Assistant Secretary, L. A. Whiteley. If exhibitors delay in the twee week before the exhibition their application it may be a matter of impossibility to make arrangements to test, in a thorough and satisfactory manner, the tardy machines.

Articles that date must be addressed to the Assistant Secretary, L. S. Agricultural Soclety, Louisville, Ky., and they will be received and stored free of The object of these trials being to show the working

ments to test, in a thorough and satisfactory manner, the tardy machines.

Articles intended for exhibition may be forwarded to the address, "Agent U. S. Agricultural Society, Louisville, Ky.," and they will be received and stored free of charge. No articles of any description will, however, be received unless all charges are prepaid by the shipper.

The duration of the trial will not be controlled by that of the show of stock and products; but will commence at the same time, and sufficient time will be employed to insure a complete test trial of all machines and implements. Exhibitors should be on hand a day or two before the commencement of the trial, to draw their lots, get their articles in readiness for exhibition, and be prepared to render assistance if required. Each one should have at hand duplicates of such parts of their implement as would be liable to break or be seriously damaged during thetrial.

A pamphlet containing a history of the proceedings, reports of Judges, will a view of the grounds at Louisville, will be published after the Fall trial, and copies forwarded to exhibitors, on application. Extra copies formarded at the cost of the publication. Owners of preminum machines may have them inserted in the Report, by furnishing a well executed engraving of the same

The fees for entrance will be as follows: ENTRANCE FEES. AUTUMN TRIAL AT LOUISVILLE, KY.

PLOWS.

Since the trial of Plows at Allany, in 1850, by the New York Society, the takent of our mechanics has been employed in developing many new and important principles in the construction of this, perhaps, most important of all agricultural implements, and the result is the production of forms of great symmetry, and increased capacity to perform thorough work. As the cost of plowing is in great part dependent on the force expended, it is a matter of great importance to find combined in one implement, lightness of draft and ability to accomplish much and thorough work. The judges will therefore consider: 1st, The character of the work performed; 2d, The power required in draft; 3d, Quality and general adaptability of materials, durability and cost of implement. Before the commencement of the trial, the condition of the furrow-slice and details of experiment will be decided and announced by the judges. The plows are to be held by competitors or persons appointed by them. The plows all tried by the Dynamometer.

It will be seen, by reference to the above premium list, that no award is offered by the United States Society for the articles of greatest excellence, which would be equivalent in cash for the expenses of exhibition. If a large compensation in mouey were to be paid at all, it manifestly should be given to exhibitors who failto receive a premium; for the indorsement by this Society of the claims of an implement or machine is ample recompense for any reasonable onthay which might be incurred in the act of exhibition. The value of the premiums is enhanced by the fact that they are only given after a thorough trial in the field, and they will not be awarded in any case unless the article competing is fully deserving of such distinction, even although there may be an absence of competitors for the same prize.
